SPERM BANK

Request Form

Known Carrier Match

With a Known Carrier Match, you can improve the chances of conceiving a healthy child by finding a donor who is proven not to be a carrier of the same conditions as yourself*. A Known Carrier Match is a reliable service which compares your carrier status report with the genetic profile of our sperm donors.

Follow the 4 steps to request a Known Carrier Match:

1. Find your carrier status report
2. Contact our Client Care team at info@europeanspermbank.com or at +45 3834 3600 to reserve straws from your chosen donors
3. Fill out this form once you receive your order number
4. Send the form with your carrier status report to matching@europeanspermbank.com

Your carrier status report and the request form will be forwarded to Amplexa Genetics, the lab we collaborate with. The test will be performed within 48 hours – working days only and Danish Bank holidays excluded.

*) Despite the reliability of the Known Carrier Match results, no test is 100% safe and secure. Therefore, please be aware that a minor residual risk cannot be ruled out. In addition, the test cannot account for spontaneous mutations that may arise in the egg, the sperm cell or the fetus.

You will receive a report from Amplexa Genetics at the e-mail address you provide below, stating which one of the two chosen donors is a good match for you. European Sperm Bank will also receive a copy of the report and will edit the order, so that it only includes straws of the matching donor. Our Client Care service will then get in contact with you to finalise the order. If neither of the chosen donors is a match, you will be asked to choose two other donors to repeat the match. Additional matching is also free.

Please be aware that only one donor will randomly be selected for the match by the genetic laboratory and the report will only state one of the donors as a match. You can only purchase straws from a donor if he is reported to be a match.

Results:

1. If a donor is stated as a match, that means he is not a carrier of the same genetic conditions as you.
2. If a donor is not stated as a match, there may be different explanations, e.g.:
 - he was not a match
 - he was not selected for the match or
 - his genetic data was not sufficient for the match.

The reason for this is to protect the right of the donors and of the donors' children not to know their carrier status. If you wish to have a matching test with one particular donor, we recommend you use our GeneXmatch service instead.

Processing of Personal Data

In order for European Sperm Bank and Amplexa Genetics to fulfil your request for a Known Carrier Match, we will process ordinary and sensitive personal data about you. This includes the signed request form, matching genetic reports, and all remaining genetic material.

Your data will be stored for 10 years to comply with the obligation to retain medical data. Data storage is required regardless of you receiving a match or not. European Sperm Bank and Amplexa Genetics will retain relevant data relating to the match.

If you have any questions regarding your personal data, please contact our Data Protection Officer at dataprotection@europeanspermbank.com

Data Protection Officer

By writing my full name, I confirm that I have read and understood the information provided in this document.

I hereby accept that I will not receive any units from my chosen donor until the results of the Known Carrier Match are available and the chosen donor is confirmed to be a match.

I also agree to notify European Sperm Bank in the event of pregnancy.
